

**Recommendations for verifying workstation for clients, who works with systems of remote service accounts**

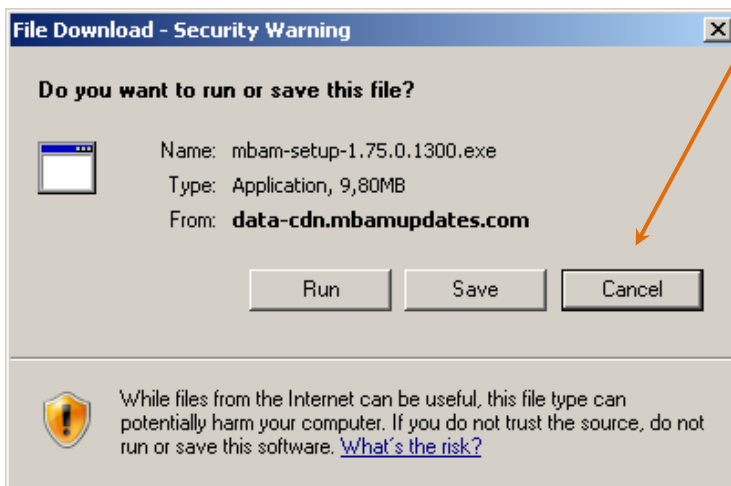

To download anti-virus software, run Internet Explorer: (if you use another WEB browser, the images presented in the document may differ from what you see on your screen)

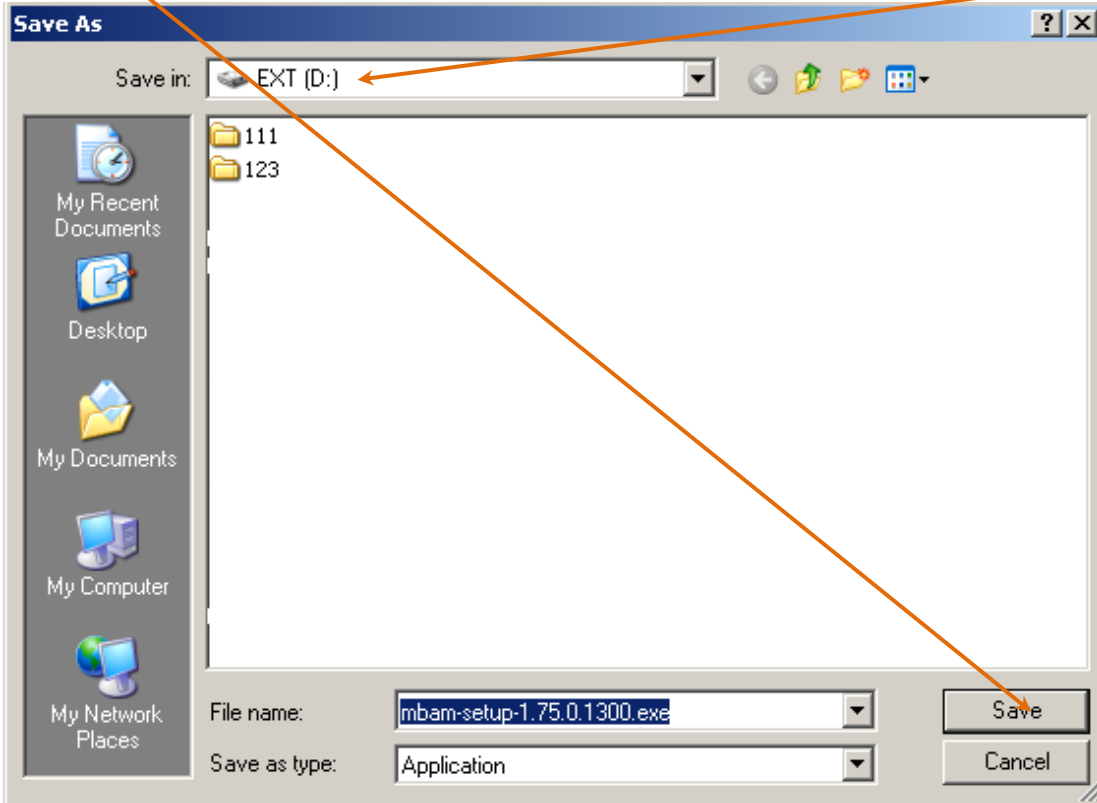

Type <http://www.malwarebytes.org/> in the adress bar and press **Enter** key. The following page will be opened:

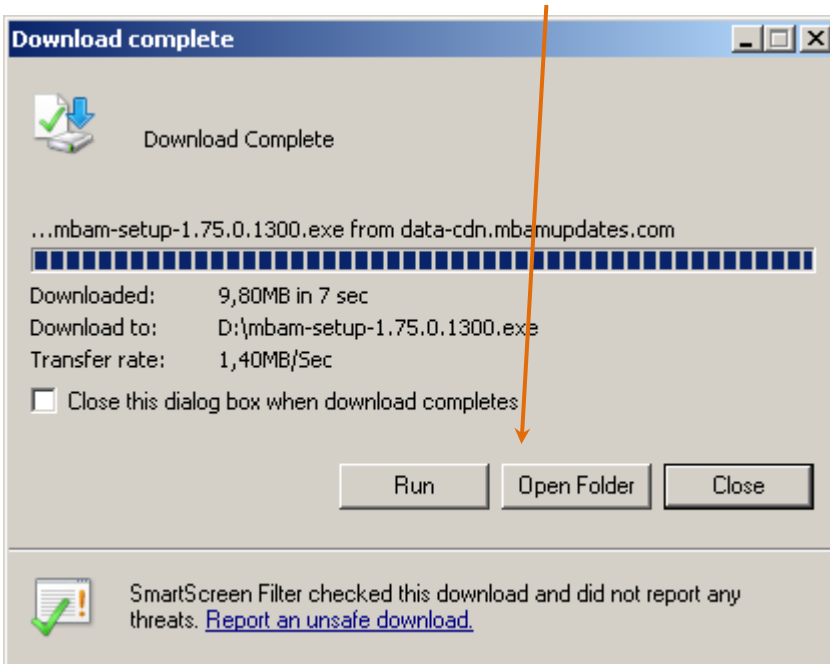

Press **Free Version Download** on the opened page, and click **Save** to specify the path.

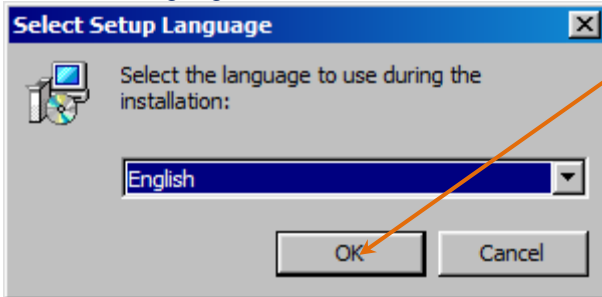

After selecting the place where you want to save the file (recommend downloading on disc **D:**), click **Save**:

After downloading the file, click **Run** to run the installation

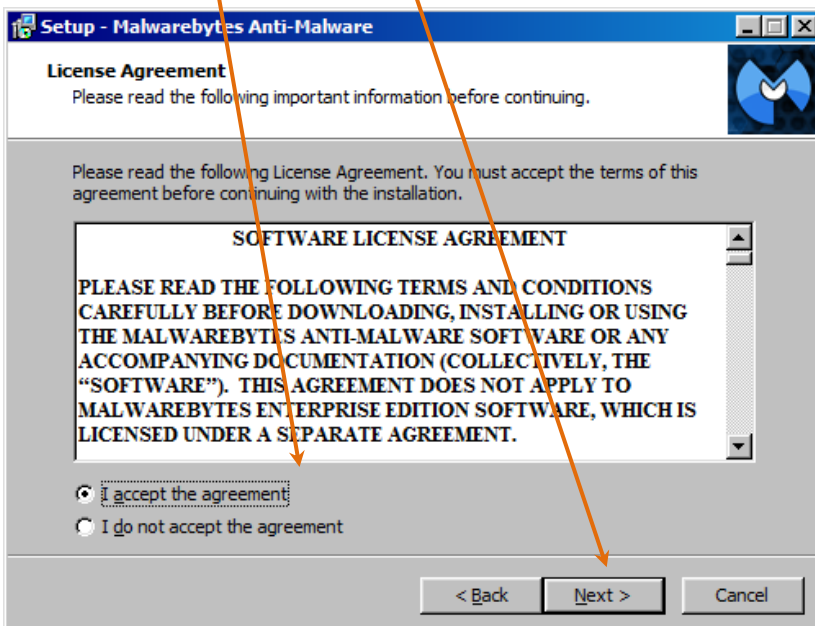

Select the language for the software interface and click **OK**

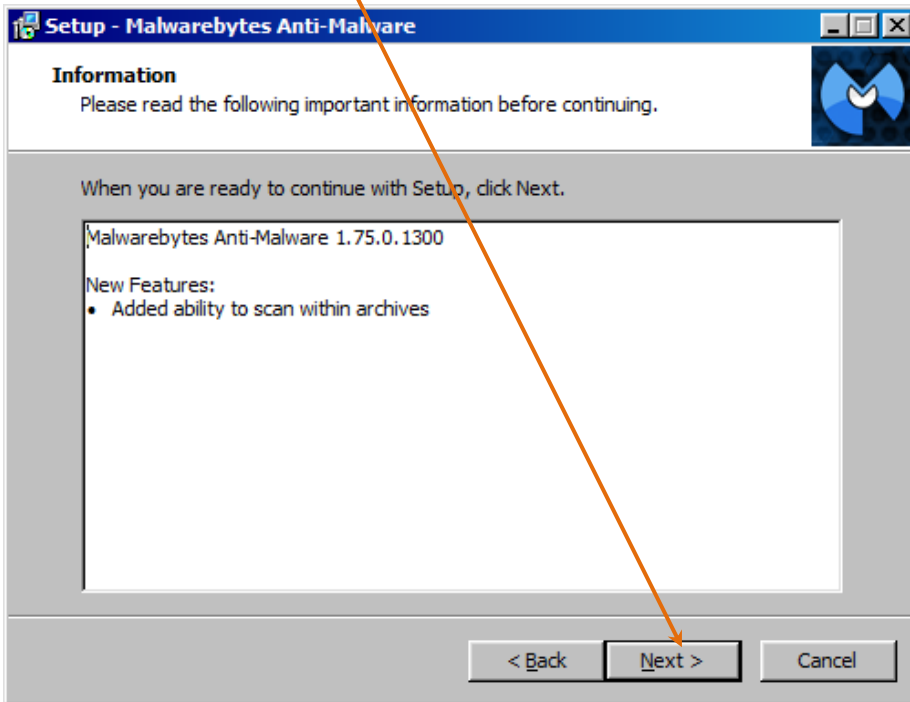

Click **Next**

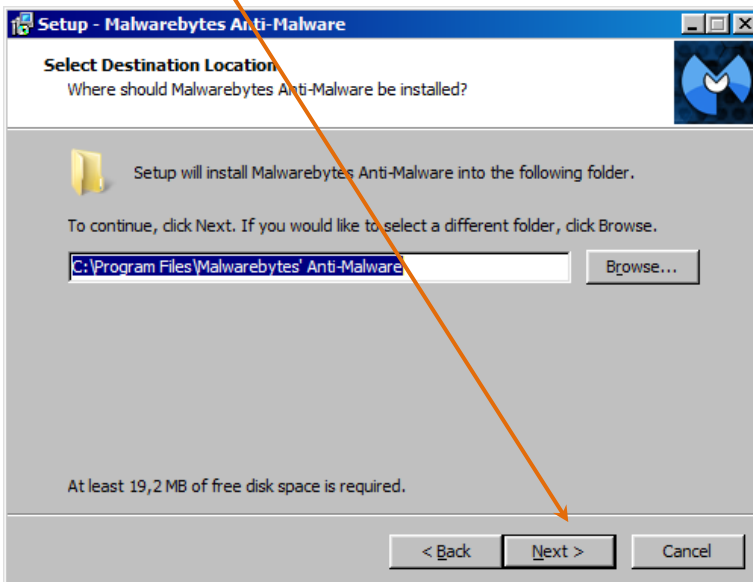

Accept the agreement and press **Next**

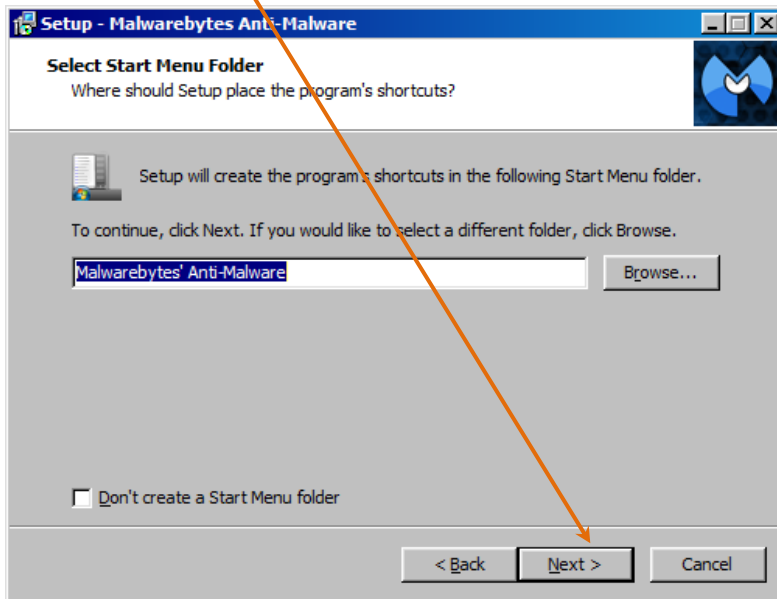

In the next window, click **Next**

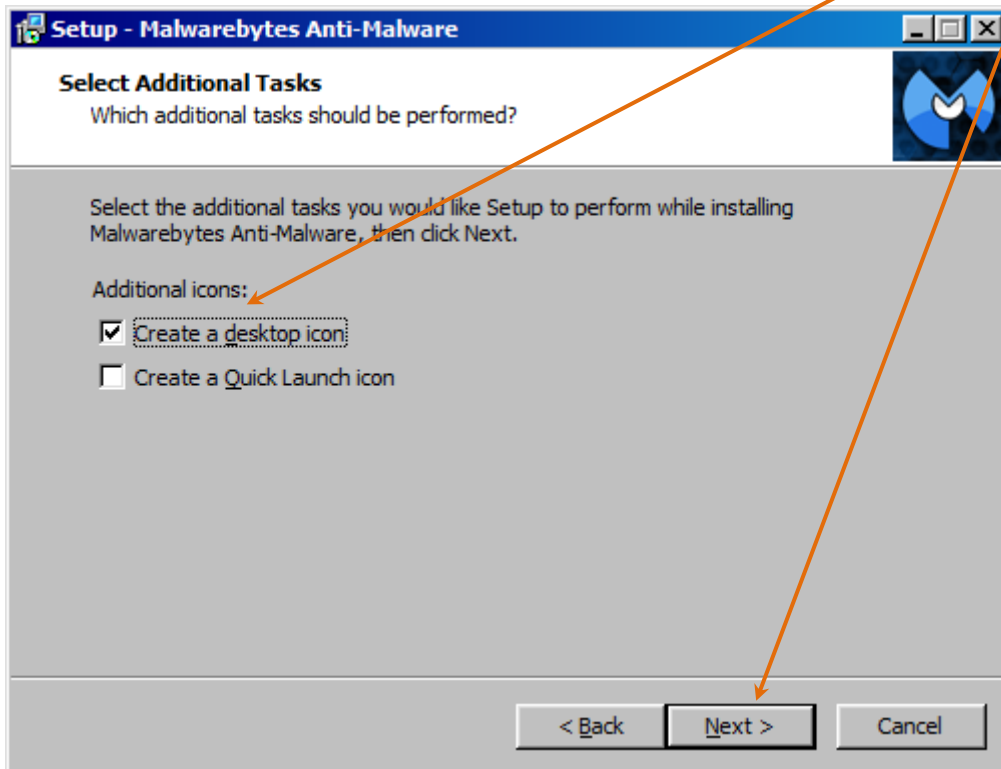

Click **Next**

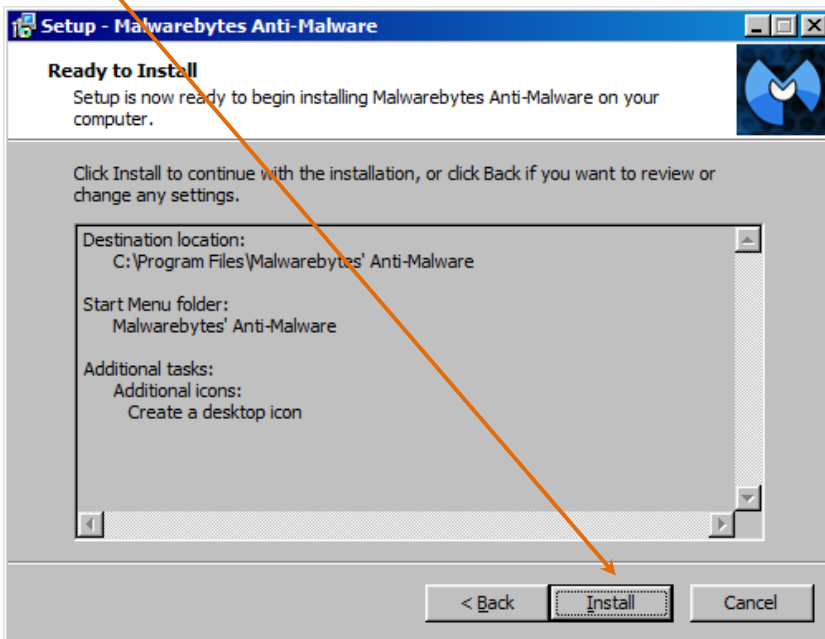

Click **Next**

In order to create a shortcut on the desktop, tick "**Create a desktop icon**" and press **Next**

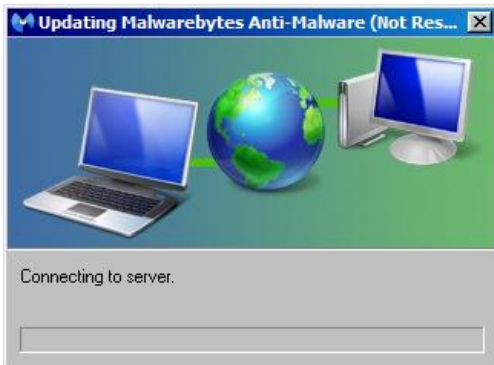

Press **Install** in the next window

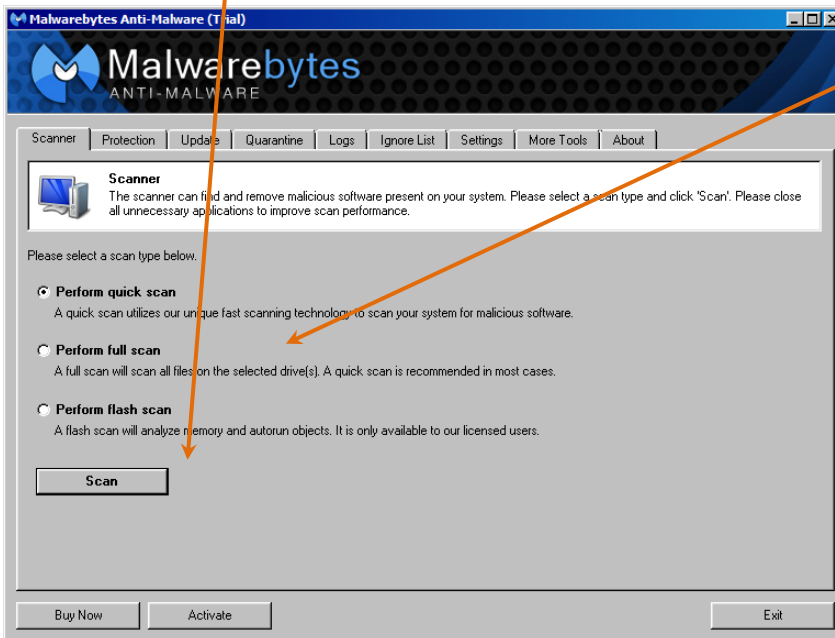

Click **Finish** in order to finish the installation

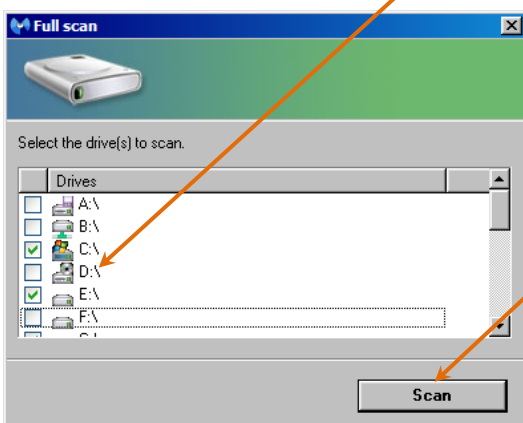

Antivirus will update the virus database

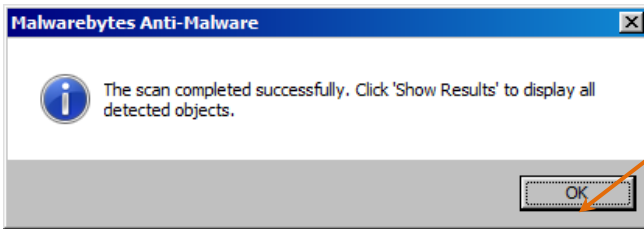

After that the scanner will check workstation, if there is any viral code. Choose **“Perform full scan”** and press **Scan**

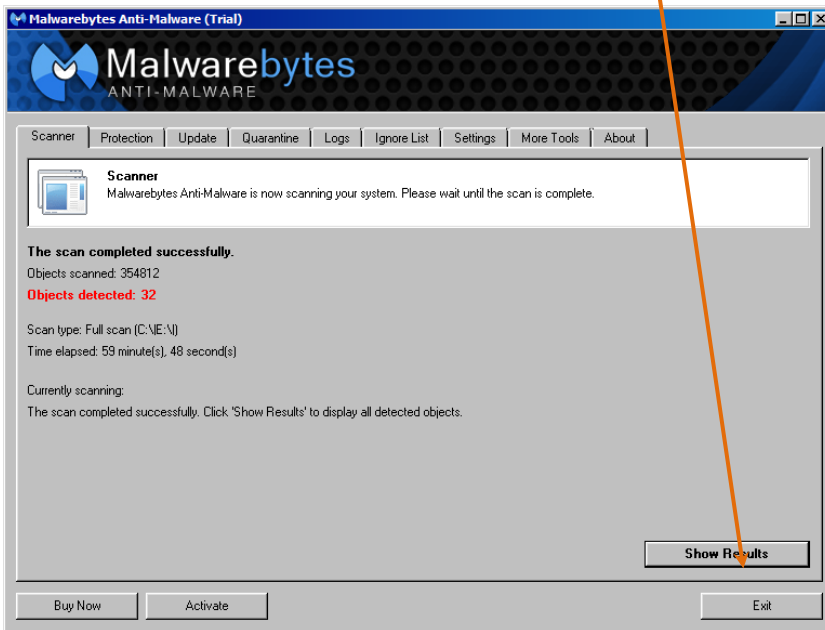

In the next window, select the **local disks** of the workstation and click **Scan**

Scanning workstation started, you must wait until the end of scan. Click **OK**

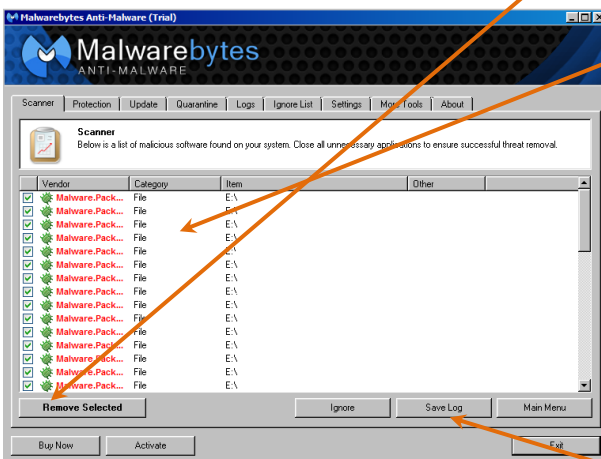

To view the results of the scan click **Show Results** in the scanner window

A list of potentially dangerous objects will be shown in the next window

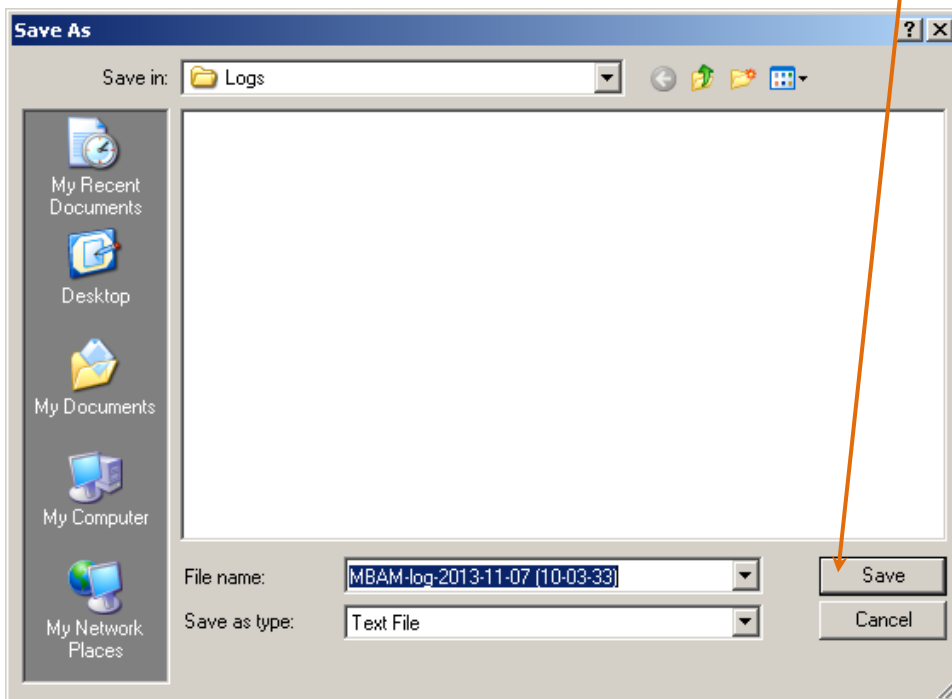

!!!CAUTION. List of objects may also contain unlicensed software used on the workstation, so it is necessary to analyze, if the object contains virus code and **select** infected items. Then delete them by pressing **Remove Selected** (you may need a help of qualified expert in Information Technology)

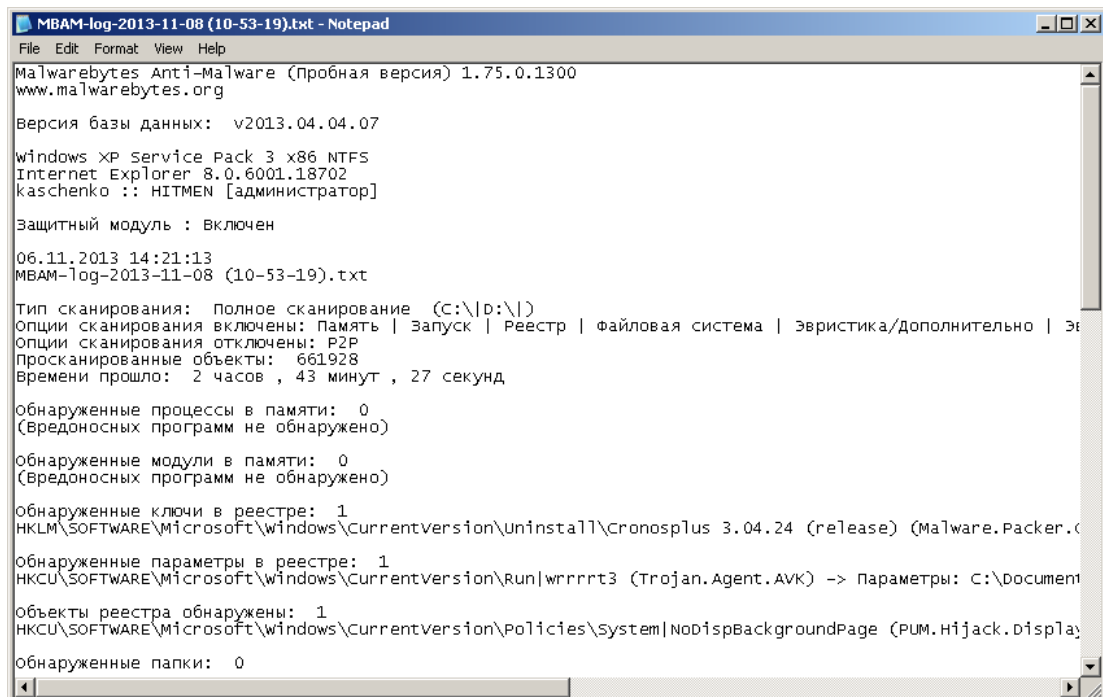

Following the viruses' removal it is necessary to click **Save log**

You must choose a location to save the report on scan results and click **Save**

The report on scan results will appear:

Having saved the report please sent it to the email address [info@piraeusbank.ua](mailto:info@piraeusbank.ua), afterwards your access to winbank will be unabled.
